

INVITATION

16 - 19 November 2015
Come and visit us: Stand 17C57

Medical Electronic Construction (MEC) is currently seeking to expand its export activities and we are contacting potential clients who might be interested in starting a long-lasting cooperation with our company. MEC is based in Brussels, Belgium, and we produce and distribute several Medical Devices and equipment.

I am contacting you because we think you might be interested in our products:

- **MEC PFT Spirometers**
- **MEC PFT Systems:** Bodyplethysmography, Diffusion and Cardio Pulmonary Exercise (CPX);
- **MEC Lactotests**

Founded in 1984, [MEC Brussels Belgium](#) grew up in the forefront of electronic respiratory and cardio-respiratory equipment's distribution. MEC R&D was created to manufacture its own innovative hardware and software technology to design CE approved medical devices in collaboration and partnership with universities.

If you would like to have more detailed information or to plan a demonstration in order to test our products, **please visit our stand at MEDICA from 16th to 19th November in Düsseldorf.**
